Jonathan Sorenson\* Department of Mathematics and Computer Science Butler University 4600 Sunset Ave. Indianapolis, Indiana 46208 sorenson@butler .edu Abstract In this paper, we remedy this situation by analyzing a slight modification of Lehmer's Euclidean GCD algorithm. Let  $u$  and  $v$  be positive integers. We show that a slightly This modified version, which we denote Algorithm ML, modified version of  $D...$
